

## **The Cycle Frontier Bar Storage key & Where to Use it**

Hey there gamers!!

Today you are going to explore the Bar Storage key to unlock the Bar Storage present in the Green's Prospect area in the Crescent Falls of the Fortuna III map. Basically, the game is infamous for its peculiar game play of using keys in many different areas such as mines, offices, houses, etc. for collecting valuable resources, weapons and gears for upgrade. These keys hardly take one safe pocket and can be retrieved after death, yet to our surprise, these weigh 1 kilo and its duplicates are sold in exchange of 1000 credits per key. So, without any further ad, let's get started:

### **Locating Bar storage key:**

This key falls under the epic rarity yet it respawns randomly inside jackets and safes. Port Admin is the best place to search for it as the place has 13 jackets all total. This key is used to unlock Bar Storage in the Crescent falls.

### **Bar storage location:**

The entity is just a small room which lies besides the street from the garage in Green's Prospect area in the Crescent Falls of the Fortuna III map. It has a big "BAR" sign written on its head and can be accessed using Bar storage key.

Always keep in mind that all keyed places have some valuable loot and after accessing the place make sure to close the door behind to enlighten you when a monster or an enemy approaches your vicinity.

Once you have reached into that dark room there will several briefcases and crates scattered around the room. Make sure to check each and every place for a loot because there might be a chance of getting other keys. This key is best to sell as it has epic rarity. Do not just stay there, approach other nearby places around the house for crates and briefcases.

That's all!!
