

## **Thymesia How to Defeat Odur**

Thymesia, no doubt, is a tough game; even players who have mastered the game mechanics might not get an upper hand over the game play. That makes it even tougher for the freshers into the game because along with, being acquainted with the game, you need to defeat the bosses- the first and foremost boss- the Odur. This enemy has agility same as gun shot, he can hit the opponent from a distance and has 2 combat phases. Info about him later in this post. Thus, if you find it difficult to defeat this ringmaster, this guide will help you make it. So, without any further ado, let's get started.

### **Features of Odur: The Ringmaster**

As said before, his tactics and attacks are quite nippy. He has equipped a deck of cards and a cane sword. The most challenging tactic of this boss is to rebirth. Yes, don't think the fight is over once you have defeated the boss, that was only his first phase, the health bar refills and the villain pounces back with multiple and stronger combos. His combo in phase 1 includes Double Strike into Cane Stab, Wind Up Strike into Hike, Double Kick into Cane Strike, Counter Back Kick, Counter Double Strike, Double One Card Flick and Five Card Flick and in phase 2 there are- Vanish into 5 hit Combo, Critical Attack: Line Energy Lash and Ultimate: Change into Four hit Cinematic Combo which becomes too much for a beginner.

### **Strategy to Defeat the Boss:**

Odur has its most common attack, that is, using his cane sword (above mentioned moves) and he kicks in succession. Try to deflect those attacks and then for counter attack like Sabber Attack (make sure you have unlocked the Short Dodge before the fight). After each of his attacks the boss becomes vulnerable for some seconds while regaining his power. At that very moment use your plague weapon to counter attack him. We recommend you to use hammer or the Halberd or if you have the Plague Weapon Lvl2 talent, you can use 2 plague weapons in the fight. Once the health bar has reached 60%, he will start throwing cards; dodging them would be easy. This was all about the phase 1.

Now for the phase 2, the boss will be swifter and more powerful. While the boss took some seconds to perform his next move in phase but in this phase, he will perform five-hit combo more frequently and with shorter time gap. Hold your breath, this level will make you sweat. Perform attacks as soon as he stops for his next move and with more accuracy. Even then there is a twist, the twist of Ultimate: Change into Four Hit Cinematic Combo. A red line will appear from him directed towards you informing that the Ringmaster is performing the specific attack. Oh! Boy there is no chance you can dodge or deflect the attack, hold your heart on your hand and run as fast as you can and as far as you can. If you get caught into this attack and you don't have more than half of your health, you are dead. This attack when get diminished, diminishes with a bang which covers a vast portion of the battleground. These are the possible counter steps you can take to defeat the Ringmaster.

That's all!!
