

Fobia St. Dinfna Hotel Where to find the WC Key and Lock

Solution

Pubsatrix has come up with a survival game which has a story mode and the protagonist needs to escape and explore a decadent hotel; discovering the dark history of Treze Trilhas. Meanwhile, when the protagonist will be figuring out the way to escape, he will come across many puzzles, locks, conundrums, etc. and the gamers might face some difficulties while solving those. One of such problems, the gamer might face is while finding out the whereabouts of the WC (Water Closet) key and the solution of the lock. This key is extremely useful for repairing the elevator that makes traversing through floors easy. Thus, this guide will help you to hunt out the key. So, without any further ado, let's get started.

Once you have progressed enough to leave your room and go to the sixth floor, your way will be blocked due to some severed furniture. This can be overcome by unlocking the security door in the same floor using the red-key card and the code written on a letter next to the door. Once you have entered into that door, you can move to the farthest end on the hallway. There you can only find the staircases to move down straight to the fourth floor

There you can find a locker which will be opened when you set the code as 184 871. The locker will contain a box. The WC key will be inside that box. Grab and head to the WC. As you do, you will notice someone has put pink bunnies at the key points. Well! that was creepy.

After getting the WC key, you can now fix the elevator. To fix the elevator, refer to article "Fobia St. Dinfna Hotel How to Fix the Elevator and Open the Toolbox."

That's all!!
